Description of Program

The Surgical Technology program prepares students for employment as surgical technologists in various healthcare settings (i.e., hospitals, sterile processing, central supply, ambulatory surgical centers, and physicians' offices). Surgical technologists assist with surgical operations by preparing operating rooms, arranging equipment, and assisting doctors during surgeries. The content includes, but is not limited to: aseptic techniques, preparation of operating room instruments and supplies, patient care procedures, surgical technology procedures, patient safety and CPR. The curriculum also includes hands-on clinical experience which entails standing for an extended period of time and working in a high-pressure environment. The curriculum integration of theory and practice prepares students to take the Certified Surgical Technologist (CST) examination.

The Surgical Technology program is accredited by

Test accommodations may be available for individuals who self-identify as having a documented disability. Requests for accommodations must be made prior to testing via the Exceptional Education Specialist. A \$15.00 test fee and valid state or government issued picture ID is required.
